

Electronic Communications Consent

Last updated: June 2020

Electronic communications terms and conditions

Symple Loans Pty Ltd ACN 624 150 849, carries out all transactions through electronic communications in accordance with any applicable laws.

By signing up for electronic communications with Symple Loans, you consent to using electronic means to agree, or bind you to, your legal obligations and to receiving all communications relating to your loan electronically. Please note that if you do not consent to receiving electronic communications from Symple Loans we may be unable to provide the services you request or may be unable to provide you with a loan.

By consenting to using electronic communications to agree or accept the terms and conditions that apply to your loan, our offers to you and any other documents, you will be taken to have signed those documents.

This consent and authority will apply to all communications permitted to take place electronically by law including, but not limited to, account statements, notices and disclosure documents we are required to give you in relation to your account or any notices from us to you. Symple Loans will rely on this consent to communicate with you by any means we choose to, including through our website (www.sympleloans.com.au) or via the email address that you have provided us. You will need to notify Symple Loans if your email address, or any other contact details, change.

Where you agree to receive communications electronically, SympleLoans will no longer be required to send you any relevant notice or document (including your Loan Agreement) in paper form. It is your responsibility to print or save all communications received from Symple Loans.

Anti-spam filters and hardware and software requirements

It is your responsibility to ensure that you maintain appropriate software and hardware to receive, access and save any electronic communications (this includes ensuring that any electronic communications we send to you are not blocked by any anti-spam software or firewall software).

It is also your responsibility to protect and safeguard your login credentials (including your username and password). You should not provide these details to any third party.
